

Action Edit Query Block Record Field Window Help

USER\_DETAILS

This Screen allows you to create a new password for using IMIS.  
You cannot create a new password without the OTP that was sent to you when you made the request to change your IMIS password.  
To create a new password fill all the fields below and then press the **Change Password** button.  
You must enter the new password in the **Re-Enter New Password** field also.  
Note: The OTP must be entered exactly as it is without any spaces before or after it.  
Press **[Change Password]** after filling up all the fields properly.

Note: You can not re-use an old password. Password can not be less than 8 characters. Password should not contain '@' character. Password must contain at least 1 digit. Password should not be similar to the old password. Password should not contain the Login ID.
